jul 17 2021 property real property personal property estate

i would like to understand how the built in function property works what confuses me is that
property can also be used as a decorator but it only takes arguments when used as a built in

a property can have a get accessor only which is done in order to make that property read
only when implementing a get set pattern an intermediate variable is used as a container into

sep 16 2010 using propertyinfo to find out the property type asked 15 years 4 months ago
modified 5 years 3 months ago viewed 204k times

apr 7 2018 188 we may get the message property has no initializer and is not definitely
assigned in the constructor when adding some configuration in the tsconfig json file so as to

jun 30 2011 the property in meta tags allows you to specify values to property fields which
come from a property library the property library rdfa format is specified in the head tag

jun 28 2018 21 an property is typically used to store a seemingly public argument e g name

into a private attribute e.g. name through getters and setters while dataclasses

descriptors like property need to be in the type's dictionary to work their magic so those in a class definition primarily affect the behaviour of instances of the class with minimal effect on

i have a dto class which i serialize json serialize myclass how can i exclude a public property of it it has to be public as i use it in my code somewhere else

jan 29 2009 while it might work in this specific case it's simply bad practice what if he wants to be distinct by a different property somewhere else for sure he can't override equals twice
